

## **Diagnosis Details**

Timestamp: 2025-07-22 12:18:49

Diagnosis Type: audio

Symptom: N/A

## **Patient's Problem**

Hello Doctor, my ankle is paining

## **Diagnosis Summary**

With what I see and hear, I think you have an ankle sprain or strain, which could be causing pain and discomfort. I would suggest applying ice to reduce swelling, taking regular breaks to rest and elevate your ankle, and using an elastic bandage to provide support, also some over-the-counter pain relievers could help alleviate the pain.
