

## Diagnosis Details

Timestamp: 2025-07-22 12:25:11

Diagnosis Type: audio

Symptom: N/A

## Patient's Problem

Hello Doctor, I think there is something wrong with my face.

## Diagnosis Summary

With what I see and hear, I think you have moderate to severe acne on your face, which appears to be causing inflammation, redness, and possible scarring, I would recommend a combination of topical and oral treatments, such as benzoyl peroxide, salicylic acid, and antibiotics to help control the acne, as well as good skincare habits like regular washing and avoiding picking or popping pimples.
